

Ophthalmic review Volume 12 a record of ophthalmic science

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 122 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: . . . observed, and in particular would have given rise to a distinct exophthalmos. A case very closely analogous to that here described has been published by Professor Sgrosso, of Naples. In his case, however, the cysticercus was not discovered complete, but only the hooklets, while another point of difference between the two was the presence of pus in the one (Sgrossos) and not in the other. Meyer concludes his paper with a brief reference to the question, already much discussed, as to whether the cysticercus produces its inflammatory effect by means of infectious germs which find an entrance with it, or by the irritating chemical action of the substances which it secretes. He adheres to the latter view, at least in the present case, and remarks in passing, that in his opinion the inflammation resulting from intra-ocular cysticercus is generally set up in this way. N. M....
