Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Classical Physics, Vol. 3 High-velocity mechanics can be constructed on the same axiomatic grounds as low-velocity mechanics but the tenth axiom must also be taken into account. xxxxx According to our conceptions, space and time are absolute categories. They have to be perceived in the way as the ordinary man does, and as Newton introduced them in the simplest and clearest way (see IIA, 2). In our century, however, on the grounds of many experiments with light beams and particles moving at high speeds, the situation arose that the old conceptions for space and time were considered as corresponding only approximately to reality, i.e., when the velocities of the particles are low enough with respect to light velocity. A new theory, whose fathers are Einstein and Minkowski, allowed the explanation of all high-velocity experiments, but this theory led to tragic results: the sound absolute Newtonian conceptions for space and time have been replaced by new ones, generally called relative, which contradict the healthy human mind drastically. During the whole last century the scientists all over the world fought desperately to save the simple Newtonian conceptions but the struggle was in vain - all experiments supported Einstein's theory, so that since many years such physicists who continue to believe in Newton are treated as simple-minded people who cannot understand certain things which other people have already perfectly understood. In the present part III of our book (and in parts IV and V) we show that a non-contradictory Absolute Space-Time Theory can be constructed, which explains all crucial experiments with light beams and fast moving particles performed up to now. We show that this is the...
