The late Dr. Turner, in his Elements of Chemistry, states that the effects of electricity are so similar to those of a mechanical agent - it appears so distinctly to emanate from substances which contain it in excess, and rends asunder all obstacles in its course so exactly like a body in rapid motion, that the impression of its existence as a distinct material substance, sui generis, forces itself irresistibly on the mind. All nations, accordingly, have spontaneously concurred in regarding electricity as a material principle; and scientific men give a preference to the same view.
